

ASHISH JOSHI

DATA & AI EXECUTIVE · CDAO / CTO / HEAD OF DATA & AI / HEAD OF DATA SCIENCE & APPLIED AI

Chief Data & AI Architect & Engineering Director, UBS | 25+ years across UBS, Credit Suisse & Barclays | AMER · EMEA · APAC

+91 95452 88666 · ashish.dataxai@gmail.com · linkedin.com/in/ashish--joshi · github.com/ashish-vxii76

EXECUTIVE PROFILE

Enterprise technology leader with 25+ years setting and executing Data & AI strategy across UBS, Credit Suisse and Barclays, accountable for architecture, delivery and investment decisioning on a \$100M+ portfolio spanning AMER, EMEA and APAC. Shapes the technology agenda for global compliance and operational-risk functions, carries funding and prioritisation through Group-level executive governance, and directs organisations of up to 150. Drives growth and enterprise value, not delivery alone: CHF 6Bn of regulatory capital unlocked, a \$125M client turnaround, and a delivery P&L grown from 0% to 15% margin with 40% revenue growth. A recognised innovator who industrialised agentic AI into an in-house platform portfolio and re-engineered how delivery itself runs against live KPIs. Trusted advisor and external voice: ranked #1 in Data Science on Favikon, and selected into UBS's leadership acceleration programme.

SELECTED IMPACT

CHF 6Bn Regulatory capital unlocked (Basel III / RWA)	\$125M Client turnaround secured (multi-year)	\$100M+ Technology portfolio owned
+40% Revenue growth (3-year)	+15 pts Profit margin lift (0% to 15%)	CHF 11M+ Annual run-cost removed (post-merger)
£11M Regulatory exposure eliminated (GDPR)	Up to 10x Faster requirement-to-delivery (AI platforms)	100% / 0 Audit success / material findings, 200+ apps
150+ Engineers led across 3 regions	7 countries Global delivery, blue-chip telecom	#1 Data Science creator, Favikon

CORE LEADERSHIP & EXPERTISE

Strategy & Operating Model: Enterprise Data & AI strategy, technology vision and roadmap, operating-model and process re-engineering, post-merger integration, ROI-driven modernisation, P&L and investment decisioning

Agentic & Applied AI: Agentic AI and AI agents, LLM orchestration, RAG, function calling, fine-tuning, model-agnostic platform design, AI explainability, NLP

AI Governance & Model Risk: SR 11-7 model risk management, model validation and controls, responsible and explainable AI, AI policy and review gates, audit traceability

Architecture & Platforms: Solution and enterprise architecture, domain-driven design, event-driven and microservices, NFR engineering, cloud (Azure, AWS, GCP), Big data and BI platform engineering

Regulatory & Risk Domain: Basel III / B3F, IFRS, capital and credit-risk reporting, SOX and operational controls, GDPR and privacy-by-design, audit-ready data pipelines

Leadership: Global team leadership and org design, C-suite advisory and governance, talent development and capability building, stakeholder partnership

Technology footprint: Python · SQL · Spark · Kafka · Databricks · Azure / AWS / GCP · TensorFlow · PyTorch · Transformers · LangChain · OpenAI / Claude APIs · vector DBs (Chroma, Pinecone, FAISS) · Power BI · Tableau · Qlik · Docker · Kubernetes · GitLab CI/CD · SonarQube · Splunk · Collibra · ServiceNow

EXECUTIVE EXPERIENCE

UBS Business Solutions India (Pune)

Oct 2017 - Present

Chief Data & AI Architect · Engineering Director · Innovation & AI Lead · India Regional Lead · Oct 2023 - Present

Own architecture, delivery and investment decisioning for the Group Compliance & Operational Risk technology portfolio, a \$100M+ book serving global banking functions, directing 100+ engineers (50+ direct) across AMER, EMEA and APAC. Set technical and AI strategy as Chief Data & AI Architect, carry funding and prioritisation through Group-level executive governance, and lead the AI adoption agenda for delivery. (Earlier in tenure: owned the capital-analytics portfolio through the Credit Suisse to UBS integration.)

Strategy & AI-Native Platforms

- **Set and executed an AI-native delivery strategy.** Built a portfolio of five platforms on the bank's internal LLM (agentic test engineering, estimation, skills intelligence, delivery analytics, planning) that compress requirement-to-delivery up to 10x and replace status reporting with live, KPI-governed execution.
- **Stood up event-sourced delivery analytics** that rebuild flow, velocity and 14 execution measures from an immutable event timeline, with Monte Carlo forecasting and an automated quality gate, enabling delivery to be run against KPIs rather than decks.
- **Embedded SR 11-7-ready AI governance** across the platform estate (rule-based, explainable scoring; RBAC and MFA; full traceability to merged PR), making agentic delivery audit-defensible by design.

Capital, Regulatory & Risk Delivery

- **Unlocked CHF 6Bn in regulatory capital** and CHF 8M TCO by re-engineering Basel III front-to-back capital and RWA reporting across Pillar 1 and Pillar 3.
- **Delivered 100% SOX and GDPR audit success** across 200+ applications with zero material findings across EY, PwC and KPMG; cleared a long-standing regulatory deferral backlog to continuous compliance.
- **Modernised the capital calculation stack** onto Spark / Kafka / HDFS, enabling real-time RWA computation and cutting submission cycles 70%; delivered single FINMA B3F reporting on the UBS Azure Data Lake with federated lineage.

Post-Merger Integration & Cost Transformation

- **Removed CHF 11M+ in annual run-cost** by consolidating post-merger platforms, rebuilding CI/CD under DevSecOps and decommissioning 200+ servers and 1,000+ feeds, completing the Credit Suisse to UBS integration 6 to 9 months ahead of the enterprise timeline.
- **Migrated 1,000+ OBIEE/Qlik reports to Power BI**, decommissioned 5,000+ dashboards and cut license usage 25% year on year through telemetry-led phasing.

Engineering Transformation & Organisation

- **Lifted engineering throughput ~5x**, raising sprint throughput from 10-12 to 60 story points and cutting delivery cycle time from 10 days to 2, by re-architecting the delivery model onto developer pods and AI-enabled automation.
- **Lead a global organisation of 50+ direct reports** and 40+ aligned engineers, embedding role-based ownership, coaching frameworks and execution standards to build high-performance teams.

Recognition: Selected into UBS LeadX (Director to Executive Director acceleration) with an APAC LeadX Challenge award · Top 300 Next-Gen Leaders, UBS India · AI Champion Core Team · Engineering Excellence, APAC CIO Star, Best People Manager and Carbon Success awards.

Barclays Technology Centre India (Pune)

Jul 2013 - Oct 2017

Vice President, Engineering Lead, Barclays International

Led engineering strategy and regulatory modernisation across Investment Banking, Barclaycard and Corporate Banking, directing 100+ engineers across AMER, EMEA and APAC on multi-million-pound portfolios. Partnered with Legal, Risk, CISO and CTO to embed secure data handling and GDPR controls into delivery.

- **Founded and scaled the Global Data Masking CoE**, growing it 5x (£400K to £2M), deploying GDPR-compliant controls across 1,200+ applications, and eliminating £11M in regulatory exposure.
- **Re-engineered front-to-back Prime Brokerage flows** (£1.5M programme), removing 40% of manual steps and enabling EMIR, MiFID II, Dodd-Frank, SFTR, Basel III, GDPR, SOX, BCBS 239 and Volcker compliance.
- **Led £4M cross-jurisdiction APAC F&O delivery**, cutting trade breaks 35% with 100% multi-regulatory compliance across 100+ regulatory change requests.
- **Drove a 22% staff-efficiency gain** by re-organising Barclays International onto shared platforms and retiring 40+ legacy stacks; rolled out enterprise Agile/DevOps lifting delivery velocity 30% and saving \$2M in operational overhead.

EARLIER CAREER

Global IO Capability Manager & Program Control Services Manager, Accenture, Pune

Jul 2011 - Jul 2013

- **Expanded the Program Control Services business through presales**, winning high-value contracts with Siemens, Mercedes-Benz, Volkswagen, Harman Kardon, JBL and Vodafone and positioning Accenture as a strategic delivery partner across industries.
- **Built and matured 13+ Infrastructure Outsourcing Services capabilities**, shaping the global service catalogue against industry benchmarks and roadmap planning.

Technology Program / Project Manager, Amdocs, Pune

Sep 2008 - Jul 2011

- **Secured a \$125M multi-year contract** by turning around an at-risk global telecom account; grew project margin from 0% to 15% and revenue 40% over three years while cutting delivery cost 28%.
- **Delivered end-to-end Amdocs 7.x implementations** for Vodafone, Telstra, Bell Canada, Sprint, Rogers, Maxis and Astro, leading distributed teams across seven countries.

Global Enterprise Apps, Asst. Project Manager, HSBC Software Development (I), Pune	Mar 2004 - Aug 2008
Sr. Associate, eBanking Implementation Analyst, Scope International, Mumbai	Mar 2003 - Jan 2004
Associate, Service Delivery, Standard Chartered Bank, Mumbai	Jan 2002 - Mar 2003

EXECUTIVE BRAND & THOUGHT LEADERSHIP

- **Ranked #1 in Data Science on Favikon** as a LinkedIn creator on AI and engineering leadership; selected into the Favikon Ambassador programme.
- **Publisher** of *THE AI DISPATCH* newsletter and white papers including *The Generative Shift* and *Sentient Grid*.
- **Dual practitioner identity** as both an enterprise Data & AI leader and a fashion photographer, deliberately built into a public brand that bridges technical depth and creative communication.

EDUCATION & CREDENTIALS

MSc, Artificial Intelligence & Machine Learning , Liverpool John Moores University	2025 - 2026
Executive PG Programme, Machine Learning & AI (Gen AI) , IIIT Bangalore (CGPA 3.7/4.0)	2024 - 2025
PGDBA, Systems & Operations , IES MCRC (Gold Medallist)	1999 - 2001
B.Sc, Chemistry , Mumbai University	1994 - 1997
Certifications: PMP • SAFe Agilist • PAL(I) • CSSGB • ITIL • AWS Practitioner • Databricks Generative AI & Lakehouse Fundamentals	
• TOGAF 9.2 L1 • Generative AI for Project Managers
